## Regulating manifold

Connects wells or horizontal biogas capture lines, used to adjust biogas flow and check quality for each inlet line. It is fitted with fine flow adjustment valves and a condensate discharge system shared by all inlets located on the outlet from the main manifold.

### Features:

- Material: high density polyethylene (HDPE)
- Support frame in galvanized/stainless steel
- Adjustment valve with flanged or threaded angled seat
- Manual control socket on each inlet
- Variable number of inlets depending on customer requirements
- Condensate separator on manifold outlet
- Condensation collection well fitted with hydraulic guard
- Condensate drainage by gravity or using a pump
- Possibility of implementing manifolds for different diameters and sizes.
